

Drill-Powered Swing-Away Jack, Zinc Plated

Buyers Part Number: 5331500

Buyers Products Swing-Away Trailer Jack is water-resistant with a 6 in. wheel and swings out of the way when not in use. The 5331500 and 5331505 may be drill-powered in addition to manual side wind crank, allowing the operator to use a portable electric drill and socket to power the jack.

- **Dual, Drill-Powered Operation**: In addition to manual side wind crank, the operator may use a portable electric drill and socket to power the jack effortlessly.
- **6-Inch Wheel**: Easily maneuverable and rolls smoothly, making it ideal for position boat trailers.
- **Quick Swing-Away Design**: Folds up and out of the way for safe, convenient towing.
- **Versatile Mounting Bracket**: Fits a variety of trailer frames for easy installation.
- **Durable Finish Options**: Choose weather- and water-resistant zinc or corrosion-resistant white powder coat for long-lasting protection.
