BXR9005

Rotaflex Lockout Kit

Installation Instructions

1. Place one (1) of the lockout plates behind the front lip and against the front of the pin box.

2. Insert one (1) carriage bolt into each side of the front plate. Feed bolt between pin box and pivot head.

Note: Use holes closest to the pin box for a snug fit against the box.

3. Line up the back lockout plate with the carriage bolts and place against the back of the pin box above lip.

4. Install one (1) flat washer and one (1) lock nut on the back of each of the carriage bolts. Fully tighten lock nuts without stripping the threads.

Note: Once fully tighten there may still be a small amount of rotation which is normal. Kit is designed to prevent full rotation of the rotating head.

CUSTOMER SERVICE COMMITMENT

Blue Ox® is committed to providing you with exceptional customer care throughout your lifetime with our products. Our team is here to assist you with any questions you may have regarding the performance of your product. Simply call (402) 385-3051 and you can speak with our technical service team.

Additionally, please visit our website to see which rallies our Destination America team will be attending. For a nominal fee, our service technician will service your towing system to ensure it's in proper working condition. Also, as a commitment to our customers, should you visit our factory, you can stay at our full service Blue Ox® campground at no charge along with enjoying a factory tour.

Again, thank you for being our customer and for the confidence you have shown in the performance of our products. It is because of customers like you we enjoy the success we have today.
