

# INSTALLATION MANUAL

## Level of Difficulty

Easy

Installation difficulty levels are based on time and effort involved and may vary depending on the installer level of expertise, condition of the vehicle and proper tools and equipment.

## Electrical Ratings

Signal circuits	3.0-amps per side
Tail / Running Circuits	6.0-amps total

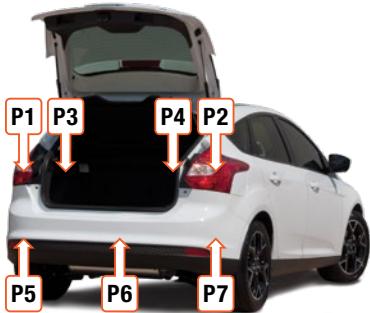

Check vehicle owner's manual or contact the vehicle manufacturer for more information.

## Wiring Location(s)

P1 and P2

## Wiring Location Guide\* for Passenger Cars (P)

P1	Behind driver side taillight housing, outside of trunk
P2	Behind passenger side taillight housing, outside of trunk
P3	Behind driver side taillight housing, inside of trunk
P4	Behind passenger side taillight housing, inside of trunk
P5	Behind driver side rear bumper
P6	Behind center of rear bumper
P7	Behind passenger side rear bumper

\* Representative vehicle shown

## Tools Required

Ratchet	Cutting tool
Socket, 8mm	Panel trim removal tool

## WARNING

Do not exceed product rating or tow vehicle lamp load rating, whichever is lower.

Be sure not to lay tools across the positive (typically noted with red covers or a red '+' symbol). This can cause a ground to short causing sparks and / or electrical shocks.

The battery connection must be fuse-protected, 10-amp max. Exceeding the product rating can cause loss of warranty, overheating and potential fire.

## Product Photo

## Hardware Photo

## NOTICE

Before you begin installation, read all instructions thoroughly.

Proper tools will improve the quality of installation and reduce the time required.

All steps must be followed to ensure the product will function properly. Once installed, test for proper function by using a test light or connecting a properly wired trailer.

## Maintenance

Periodic inspection of all wires and connections should be performed to ensure there is no visible damage or loose connections.

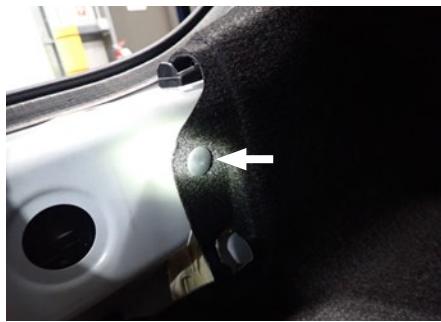

## Step 1

Open the trunk and remove the floor coverings exposing the flat fix kit. Remove this foam tray, exposing the battery. Disconnect the negative battery terminal. Be sure to fasten this wire down and away from the battery when completing the installation process.

## Step 2

Use a panel trim removal tool to remove the threshold by pulling straight up. Remove the push fasteners securing the felt trunk liner in place under each side of the threshold.

### Step 3

Starting on the driver side, pull back the felt trunk liner in front of the taillight. Use an 8mm socket to remove the two taillight fasteners (nuts). Once the taillight fasteners are removed, pull the taillight out straight back from the vehicle.

Locate the vehicle taillight wiring connectors. The connectors will be similar to those on your new custom wiring product. Separate the connectors from the taillight housing taking care not to damage the locking tabs.

### Step 4

Locate the grommet on the factory wiring and remove it from the body of the vehicle.

Repeat step 3 and 4 on the passenger side.

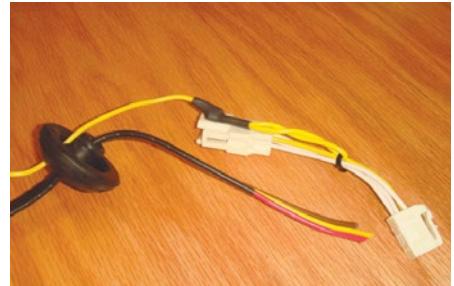

### Step 5

Locate the grommet behind the taillight where the vehicle's taillight wiring passes through from inside the cabin to the taillight. Remove the grommet and cut a slit large enough to route the new custom wiring end though.

Route the custom wiring end with the brown and red wires out through the grommet opening and though the slit in the grommet. Insert the custom wiring end with brown and red wires between the separated connectors. Make sure the connectors are fully inserted with locking tabs in place.

Reseat the grommet. Use the provided sealant to seal the cut in the grommet and around all the wires.

## Step 6

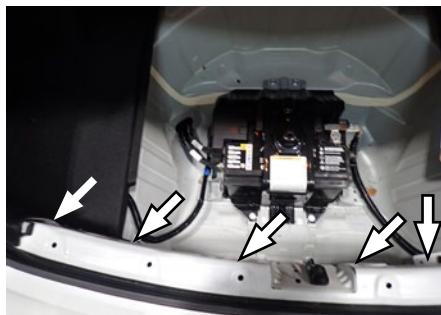

Locate the custom harness with the yellow wire. From inside the trunk, under the trunk liner, route this harness through the hole that was filled by the grommet in step 4. Attach the mating housings together.

Route the control module along the back of the vehicle to the battery location.

## Step 7

Locate the custom harness with the green wire. Route the harness along the back of the vehicle to the passenger side of the vehicle under the trunk liner through the hole that was filled by the grommet. Attach the mating housings together. Adjust the harness so that the black control module can be mounted in the battery area.

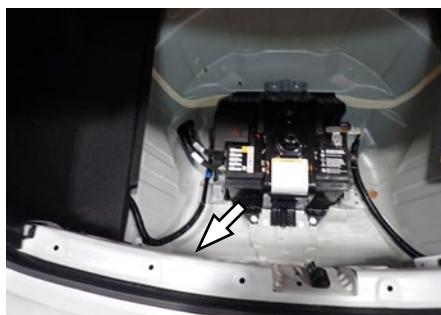

## Step 8

Connect the power wire (black wire with the fuse holder) to the positive post, and the ground wire to the negative post of the battery.

Adhere the black converter box in the base of the battery mount area using the provided double-sided tape.

Test the 4-flat with a working trailer or tester. Reinstall the grommets, with the green and yellow wires in the cuts in the grommets.

## Step 9

Adjust the wires and cable tie as needed along the rear of the vehicle. Use the silicone sealant to seal the cuts in the grommets

When in use, route the 4-flat with the center of the vehicle, and out of the hatch to the trailer be sure to stay clear of the hatches latching mechanism. When not in use roll up and store in a convenient, out of the way location. Secure any loose wires with provided cable ties.

Reinstall all items removed during install. If it was disconnected at the beginning of the installation, reconnect the negative battery terminal. Install the provided 4-flat dust cover to help prevent corrosion.

# POWERED CONVERTER LEAD INSTRUCTION SHEET

## FICHE DE CONSIGNES DU CONVERTISSEUR D'ALIMENTATION

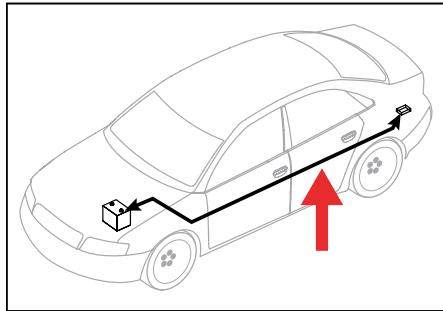

## HOJA DE INSTRUCCIONES DEL CONDUCTOR DEL ADAPTADOR ALIMENTADO POR BATERÍA

### NOTICE AVIS / AVISO

Illustrations are for reference only. Battery location may differ depending on the vehicle.

Les images ne sont fournies qu'à des fins de référence. L'emplacement de la batterie peut varier en fonction du véhicule.

Las ilustraciones son solo para referencia. La ubicación de la batería puede variar según el vehículo.

### WARNING AVERTISSEMENT / ADVERTENCIA

Route 12 GA wire to vehicle battery location, taking care to avoid any pinch points and hot or rotating components.

Acheminer le câble de calibre 12 à la batterie du véhicule en prenant soin d'éviter les points de pincement et les éléments chauds ou pivotants.

Pase el cable calibre 12 hacia la ubicación de la batería del vehículo, con cuidado de evitar atascos y componentes calientes o giratorios.

### WARNING AVERTISSEMENT / ADVERTENCIA

To avoid personal injury or property damage, check for miscellaneous items that may be behind or under any surface before drilling.

Pour éviter les blessures et les dommages matériels, vérifier les divers articles qui peuvent se trouver derrière ou sous la surface avant de percer.

Para evitar lesiones personales o daños materiales, verifique que no haya ningún elemento detrás o debajo de la superficie antes de perforar.

### NOTICE AVIS / AVISO

1. This converter system is to be used only on 12 volt negative ground systems.

2. Secure power wire to vehicle chassis using cable ties provided.

3. When passing the power wire through sheet metal, use an existing grommet, add a grommet or use silicone to protect the power wire from sharp edges.

4. Overall T-connector design may differ from illustration. The illustration should be used for power lead instruction only. Illustration is not to scale.

1. Ce système de convertisseur ne doit être utilisé qu'avec une prise de masse de polarité négative de 12 volts.

2. Fixer le câble d'alimentation au châssis du véhicule à l'aide des courroies d'attache de câble fournies.

3. Utiliser un œillet existant, ajouter un œillet ou appliquer du silicone pour protéger le câble d'alimentation des rebords tranchants au moment de le passer à travers la tôle.

4. La disposition générale du connecteur en T peut différer de l'illustration. Celle-ci ne doit être utilisée que pour le convertisseur d'alimentation. L'illustration n'est pas à l'échelle.

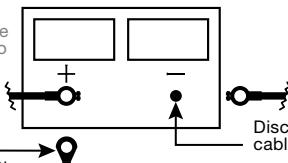

1. Este sistema de adaptadores solo se debe utilizar con sistemas con polo negativo a masa de 12 voltios.

2. Sujete el cable de alimentación al chasis del vehículo utilizando los sujetacables suministrados.

3. Al pasar el cable de alimentación por la lámina de metal, utilice la arandela pasacable existente, agregue una arandela pasacable o utilice silicona para proteger el cable de alimentación de los bordes filosos.

4. El diseño general del conector T puede ser distinto de la ilustración. La ilustración solo se debe utilizar para la instrucción del conductor de alimentación. La ilustración no está a escala.

**Vehicle battery**  
Batterie du véhicule  
Batería del vehículo

Use ring terminal for battery connection

Utiliser une cosse à anneau pour effectuer la connexion à la batterie

Utilizar el terminal de anillo para la conexión de la batería

Fuse holder with 10 amp fuse max (install fuse after all other steps are complete)

Porte-fusible avec fusible de 10 A max (installer le fusible après avoir effectué toutes les autres étapes)

Portafusible con fusible de 10 A máx. (instalar fusible una vez completados los otros pasos)

Green - Right turn  
Red - Brake  
Yellow - Left turn  
Brown - Taillight

Vert - Clignotant droit  
Rouge - Frein  
Jaune - Clignotant gauche  
Brun - Feu arrière

Verde - Giro a la derecha  
Rojo - Freno  
Amarillo - Giro a la izquierda  
Marrón - Luces traseras

**Generic housings shown for reference only**  
Les boîtes génériques ne sont fournies qu'à des fins de référence  
Se muestran carcasa genéricas, solo para referencia

Disconnect negative battery (-) cable before wiring the power wire

Déconnecter le câble négatif (-) de la batterie avant d'installer le câble d'alimentation

Desconectar el cable negativo (-) de la batería antes de conectar el cable de alimentación

Butt connector  
Raccord bout à bout  
Conector a tope

12 GA wire or larger  
Câble de calibre 12 ou plus  
Cable calibre 12 o mayor

Route black wire to positive battery (+)

Conneter le câble noir à la borne positive (+) de la batterie

Pasar el cable negro hacia el polo positivo (+) de la batería

If using the converter as a powered module for a two-wire system, the red brake wire must be grounded

Si le convertisseur est utilisé comme module d'alimentation pour un système à deux fils, le câble de frein rouge doit être mis à la masse

Si se utiliza el adaptador como un módulo energizado para un sistema bifilar, el cable rojo del freno debe estar conectado a tierra

Mount converter using the provided double-sided tape

Installer le convertisseur à l'aide du ruban adhésif double face fourni

Montar el adaptador utilizando la cinta de doble cara suministrada

Butt connector  
Raccord bout à bout  
Conector a tope
